About our coatings | Sobre nuestros recubrimientos

Coatings for exterior application AAMA 2604 & 2605

We have a complete line of super durable high performance powder coatings for architectural applications such as facades, pergolas, screening, railings, and others. By integrating the electrostatic painting process within our own manufacturing plant, we ensure total quality control at every stage of production. This guarantees proper application and curing of the coating, eliminates risks in the finish, and extends the product's service life by providing the material with additional protection against weathering, corrosion, and mechanical wear.

Acabados de aplicación exterior AAMA 2604 & 2605

Contamos con una línea completa de recubrimientos en polvo de alto rendimiento súper durables destinados a aplicaciones arquitectónicas como fachadas, pérgolas, revestimientos, rejas, entre otras. La integración del proceso de pintura electrostática dentro de nuestra planta de manufactura garantiza un control total de calidad en cada etapa de producción. Esto permite asegurar la correcta aplicación y curado del recubrimiento, eliminando riesgos en el acabado y extendiendo la vida útil del producto, al brindar al material una protección adicional contra la intemperie, la corrosión y el desgaste mecánico.

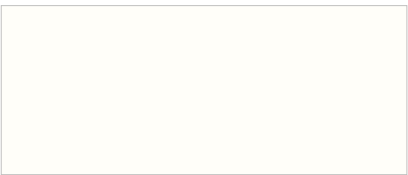

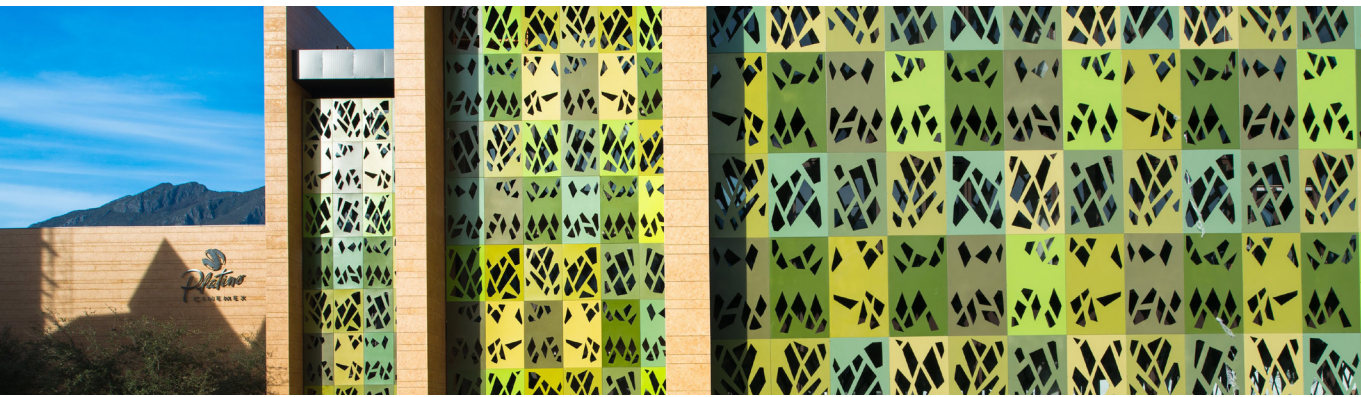

Our coatings have an excellent retaining of brightness and color, offering an excellent quality, highly resistant product ideal for exteriors and interiors applications. These coatings solutions are economical in the long term as they do not represent a high maintenance cost. Our architectural solutions have these finishes that have a low environmental impact due to the painted panel can be removed and recycled 100% in the future.

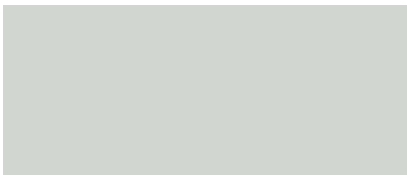

Nuestros acabados cuentan con una excelente retención de brillo y color que esto se traduce en excelente durabilidad ofreciendo un producto de excelente calidad, altamente resistente ideal para exteriores e interiores. Estas soluciones en acabados son económicas a largo plazo al no representar un alto costo en mantenimiento. Nuestras soluciones arquitectónicas cuentan con estos acabados que son de bajo impacto ambiental ya que el panel pintado se puede retirar y reciclar al 100% en el futuro.

Anodized | Available exclusively in aluminum
Anodizado | Disponible exclusivamente en aluminio

The anodized finish increases electrical insulation, protects against corrosion and wear. This finish increases the durability capabilities of aluminum, making it a durable and highly aesthetic coating.

El acabado Anodizado aumenta el aislamiento eléctrico, protege de la corrosión y al desgaste. Este acabado aumenta las capacidades de durabilidad del aluminio volviendolo un revestimiento durable y altamente estético.
